Evernorth Intellisphere℠
Personalized application with deep analytic capabilities

“It’s so easy to run claim detail reports with a variety of ways to view the results and find what I need.”

– Comment from a “very satisfied” client user

Integrated Pharmacy + Medical Data

+ Access up to seven years of data containing more than 10B prescription claims, 300M patients, 3B medical claims, and 5M providers
+ Robust query abilities meshing pharmacy and medical claims data in the same query

Tailored Queries and Benchmarking

+ Highly customizable filters and criteria to allow you to choose your own adventure and analyze your data how you see fit
+ Benchmark providers and pharmacies against peers
+ Export any report

Personalization

+ Easily sortable, filterable, and exportable detailed views/reports
+ Customizable populations, filters, export columns, and more
+ Upload/Create provider, pharmacy, and patient cohorts
+ Upload lists of drugs, diagnosis and procedure codes

Provider and Pharmacy Insight Reporting

- Provider and Pharmacy Insight Reports show the basic details about their location, specialties and affiliations from NPPES
- All of this can be found by searching for a specific provider or pharmacy or directly from any report you run
- List capabilities allows you to create provider and pharmacy cohorts to use throughout the application
- You also then further understand their prescribing/filling habits by reviewing the available tabs in the report below.
- These are benchmarked against providers across their state and national level
- You can also benchmark them against a customized list of providers or pharmacies to see how they compare

Patient Profile View

- Patient Profiles are available to any user that is granted PHI access
- All of this can be found by searching for a specific patient or directly from any report you run
- You then further understand their prescribing/filling habits by reviewing the available tabs in the report below.
- Here you can view their eligibility information
- List capabilities provide the ability to create patient cohorts to be utilized throughout the application

Custom Query Capabilities

Our core query capabilities are the brains of our application. You can start at the highest level with our dashboards and then drive into the details here.

	Custom Report: Utilize filters to identify Providers, Pharmacies, Patients and Drugs	**Concomitant Therapy:** Identify evidence of treatments occurring at the same time	**Omission of Care:** Evidence of a condition and absence of treatment
Features	+ Include and exclude filters + Refine results with multiple filters + Upload lists of providers, patients, NDC, & GCN's as well as create them from your results	+ Concomitant conditions + Include and exclude filters + Unique timeframes for each filter + Overlapping days supply and timeframe (Ex. 30, 60, 90 days)	+ Omission conditions + Include and exclude filters + Select different timeframes for each filter
Examples	+ *Maintenance medications filled for 30 days at retail* + *Potential FWA concern foot bath compounds written in the Midwest but filled at Texas pharmacies* + *Multi-source brand name Acne medications costing >$500/claim*	+ *Therapeutic duplications (ACE and ARB, multiple NSAIDs, include combination meds)* + *Major drug interactions* + *Opioids used with other respiratory suppressants in older adults* + *GLP1 and DPP4 combos*	+ *Diabetes diagnosis without a statin* + *Remicade not provided in an office* + *Rheumatoid Arthritis diagnosis without a disease modifying drug* + *Ozempic claims without a diabetes diagnosis (off-label use)*
