

Accredo improves outcomes by providing holistic patient care

By addressing clinical needs and social determinants of health (SDOH), Accredo® Specialty Pharmacy is improving patient adherence and reducing costs.

A cancer patient's journey with Accredo will experience our unique clinical model

- + One-on-one clinical assessments with nurses and pharmacists.
- + Digital adherence and symptom monitoring capabilities.
- + Screening for social determinants of health (SDOH) for all patients.
- + Social worker for emotional and resource support.
- + Continuous adherence monitoring and interventions for optimal adherence.
- + Oncology nutritional support staff and TherapEase Cuisine® on-line resource.

93.1% patient satisfaction for patients undergoing an oncology therapy.⁴

1M+ SDOH screenings delivered to Accredo patients. Patients noting concerns are connected with social workers to identify resources.¹

11.8% higher adherence for patients in the oncology TRC using Accredo's digital tools.²

\$225M in copay assistance coordinated in 2025 specific to oncology treatments.³
