

Research shows PBMs save private-sector employers and patients \$625 per year on prescription drug costs

Express Scripts
By EVERNORTH

1. Generics include “unbranded generics” but do not include “branded generics” as reported by IQVIA. Graphics/price-tags reflect “estimated net cost (net-of-rebates) per prescription.” 2. “Savings” reflect difference between estimated total costs with PBMs vs hypothetical costs without PBMs, for employer-sponsored plans only (i.e., exclude individual insurance/exchanges, Medicare Part D, Medicaid, Other insurance, and Uninsured). Note: PBM = Pharmacy Benefit Manager. Total enrollment in employer-sponsored health plans estimated to be approximately 160 million. Source: Visante estimates for 2020. Methodology based on Pharmacy Benefit Managers (PBMs): Generating Savings for Plan Sponsors and Consumers, February 2020. ©Pharmaceutical Care Management Association.
