

EVERNORTH IntellisphereSM

BIG DATA, BIGGER POSSIBILITIES

About Us

Intellisphere is Evernorth's patented, web-based analytics engine designed to provide a full-spectrum view into your population's cost and quality metrics, offering comprehensive insights into providers, pharmacies, patients, drugs, diagnosis, and procedures across integrated datasets providing high level insights down to claim level details.

Our Mission

To put the power of our lab's expansive data insights into your pocket, empowering you with on-demand insights and exploration. Our easy to use platform seamlessly integrates new data to identify unwarranted variability and predict cost, risk, and quality concerns so you can act fast to increase affordability, improve patient outcomes and solve their biggest healthcare challenges.

Have the lab in your pocket with...

Population Cost & Trends

Analyze population level cost and trend reporting with personalization options

Social Determinants of Health

Understand how outside conditions may be impacting your populations

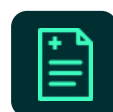

Provider and Pharmacy Insights

Benchmark providers and pharmacies to change behaviors

Total Cost of Care

Optimize medical condition management through integrated data

Customized Reporting

Develop highly customized reports without the need for complex coding

Quality Care Management

Leverage dashboards and patient-specific reports to manage the quality metrics important to you

Contact the Intellisphere team to learn how Intellisphere can help you.
