

Evernorth MoreThanRxSM Services

Bringing the future of pharmacy
to life to expand patient access

Care shortages are leaving millions without access to care

Hospitals, doctors, specialists and other health care providers are not easily accessible in many areas of the country. These care shortages often occur in rural and urban areas because of geographic and economic limitations. America is also facing a serious physician shortage—making it difficult to find a primary care doctor when a prescription or certain health services are needed.

Plan sponsors want and need to find new ways to make basic care products and services more convenient and affordable while still meeting members’ individual needs.

Further evolving the pharmacy as a key site of care

America’s pharmacists are expanding their roles beyond medication dispensing—increasing health care affordability and convenience for plans and patients. By shifting some care to the pharmacy, physicians have additional time to care for patients with more-complex needs.

MoreThanRx is a suite of health care solutions that opens new doors of access for patients, with a variety of convenient health services available at the pharmacy. We are able to offer these solutions because of our retail and community pharmacy partnerships nationwide, reimbursing pharmacists for the services they provide. In addition, we continue to collaborate with organizations also focused on tangible clinical outcomes and innovative approaches to patient care.

U.S. physician shortage expected to be up to 86,000 by 2036*

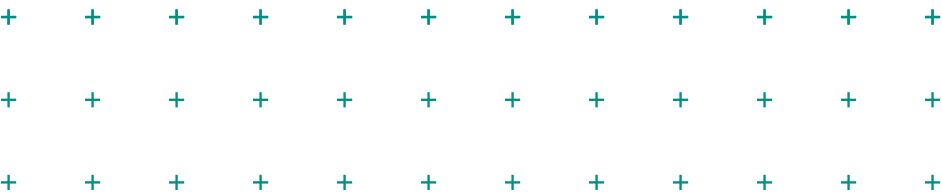

MoreThanRx services are available in all 50 states

including Washington D.C. and Puerto Rico.**

60% of members live within 5 miles

of a pharmacy that offers MoreThanRx services.***

IndependentRx Initiative

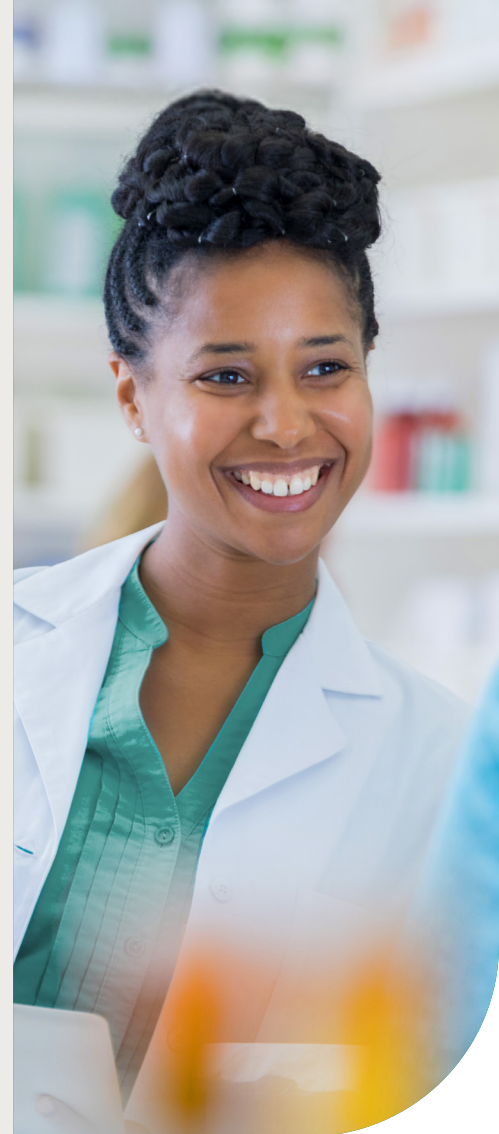

On the next page, learn about how we partner with independent pharmacies and continue to evolve the MoreThanRx suite of services.

Partnering with independent pharmacies to advance access

IndependentRx is our health care initiative to advance access through partnerships with independent pharmacies. Through this initiative, which contributes to the evolution of the MoreThanRx suite, we are:

- + Creating solutions that enable payers to more easily meet the needs of members who rely on local independent pharmacies
- + Expanding pharmacy care services to grow the role of pharmacists
- + Enhancing engagement with local pharmacies through the **Independent Pharmacy Advisory Committee:**

This committee is the industry's first-of-its-kind and led by our senior director of Independent Pharmacy Affairs. The group includes independent pharmacy owners and leaders from across the country who meet regularly on the ways Evernorth can enable expanded roles for pharmacists.

The MoreThanRx suite continues to expand, with various enhancements to existing services and new services coming soon.
