

SAFEGUARDRX®

Protect your plan and your members

To complement your overall benefit design, consider SafeGuardRx® by Evernorth®, a value-based solution that empowers patients to take control of their health and protects plans from the high costs of care for some of the **most complex chronic conditions**.

Protection

PROGRAM	BENEFITS
MARKET EVENTS PROTECTION PROGRAM® Protection from unexpected price increases	+ Quick action against extreme price increases, unwarranted price discrepancies and patent expirations + Drives members to the most clinically appropriate, cost-effective therapies, or dispensing channels
INFLATION PROTECTIONSM PROGRAM Shields plans from the full cost impact of year-over-year price increases on brand drug spend	+ Guarantees against annual inflation
SPECIALTY ADHERENCE PROTECTIONSM PROGRAM A patient-centric, clinically tailored solution for individual specialty patients to proactively eliminate waste and boost patient adherence	+ Clinically determined logic with individualized treatment and patient support + Reduced expensive specialty waste by dispensing a shorter supply and ensuring medication tolerance + Industry-first financial protection by reimbursing the net cost of any filled 90-day program-preferred medication if a patient leaves plan early + Medication stabilization and adherence, once therapy is stable, maintenance medications that are best suited for a greater days' supply will be filled for a simpler patient experience + Member choice and convenience fill program-preferred medications with either Accredo Specialty Pharmacy or select in-network retail pharmacies

Traditional Therapy

PROGRAM	BENEFITS
CARDIOVASCULAR CARE VALUE® PROGRAM Uniquely delivers better care at lower costs for proprotein convertase subtilisin/kexin type 9 (PCSK9) inhibitors and preferred anticoagulant medications	+ PMPY cost cap for select PCSK9 inhibitors, anticoagulants and heart failure therapies (varies by client utilization) + Early discontinuation reimbursement for participating CCV products + Members can fill preferred PCSK9 inhibitors, anticoagulants and select heart failure medication at any in-network retail pharmacy or the Express Scripts PharmacySM + Access to the enhanced care model of the Cardiovascular Therapeutic Resource Center® + Provider outreach for high-risk patients taking select heart failure medication who may benefit from additional therapies
DIABETES CARE VALUESM PROGRAM Motivates patients and delivers healthier outcomes to contain diabetes costs through patient engagement technologies and quality pharmacy networks	+ Digital diabetes prevention and obesity solution encourages healthy lifestyles and helps prevent diabetes diagnoses + Digital care for type 1 and type 2 diabetes promotes member engagement through blood glucose remote monitoring by securely sending results to clinicians who can analyze the data and provide timely, meaningful outreach + Use of a Continuous Glucose Monitor (CGM), when clinically appropriate, provides patients and providers with more actionable longitudinal insights. Additional discounts are available on participating CGMs for net new cost savings + Supply fills through a quality pharmacy network + Access to the enhanced care model of the Diabetes Therapeutic Resource Center® + Reimbursement when patients fall off therapy through an early discontinuation credit for participating Diabetes Care Value medications
HIV CARE VALUE® PROGRAM Helps improve utilization and adherence while working toward a future with zero new HIV diagnoses	+ Offers patients the option to use an adherence device + Latest policy updates and evidence-based insights delivered to providers so they can educate their patients on HIV prevention + No plan design changes or channel restrictions when participating PrEP medications are co-preferred + Access to the enhanced care model of the HIV Therapeutic Resource Center®
NEUROLOGICAL CARE VALUESM PROGRAM Helps plans save on preferred chronic migraine or epilepsy-related medications while giving patients specialized clinical support for a better experience and improved outcomes	+ Early discontinuation reimbursement for preventative calcitonin gene-related peptide (CGRP) inhibitors and epilepsy medications, and exclusive product discounts on preferred acute migraine medications + More specialized clinical support with new-to-therapy coaching, adherence monitoring and outreaches + Access to the enhanced care model of the Neuroscience Therapeutic Resource Center®

PROGRAM	BENEFITS
PULMONARY CARE VALUE PROGRAMSM Holistic approach to maximize the health of patients being treated for asthma or chronic obstructive pulmonary disease (COPD) and contain costs through patient-engagement technologies and a quality pharmacy network	+ Supply fills through a quality pharmacy network + One-on-one support from a team of extensively trained and disease-specialized clinicians in the Pulmonary Therapeutic Resource Center[®] who help patients avoid dangerous medication mistakes and provide guidance for saving money on prescriptions.
WEIGHT MANAGEMENT CARE VALUESM PROGRAM Prevents greater downstream medical spend through providing access to anti-obesity medication to the right patients, in combination with the right support tools along the way	+ Specialized support to help patients address and tackle personal health barriers + Utilization management tools to help the right patients have access to the right medications + Potential savings on medical costs by preventing costly and complex comorbidities + Convenient access to anti-obesity medication from any in-network pharmacy + Smart support from Omada for PreventionSM for eligible patients + Access to the enhanced care model of the Express Scripts Therapeutic Resource Center[®]
